15. (Amended) A vehicle driveline parking brake assembly, comprising:
- a moveable driveline component;
 - a stationary driveline component that remains stationary relative to a portion of a vehicle;
 - a braking member associated with the moveable driveline component such that the braking member remains stationary relative to the moveable driveline component;
 - an engaging portion associated with the stationary driveline component, the engaging portion is selectively moveable into a braking position where the engaging portion engages the braking member;
 - a spring that biases the engaging portion into the braking position; and
 - an electrically powered actuator that selectively moves the spring and releases the engaging portion out of the braking position.
